ET-516RE

WHEELED TROMMEL

Larger producers can achieve high quality materials with the ET-516RE trommel. McCloskey Environmental offers a wide range of drum designs and screen sizes to improve quality and meet high demand. Material such as topsoil, compost, sand and gravel, and wood chip spend more time in the sixteen foot drum for better screening results.

The three screen sections allow for flexibility in sizing to maximise productivity, while the hydraulically olding end conveyor allows oversize material to be effectively stockpiled. For heavy duty applications, a remote control hydraulic tipping grizzly can be added to scalp off large material.

FEATURES

- 5'x16' heavy duty trommel drum
- Wheeled mobility
- Integrated hydraulic folding stockpiling conveyors
- Radial Controlled conveyor
